

YOUR TRUSTED PARTNER FOR TEMPORARY TRAFFIC SYSTEMS

Every day, our teams are out on the roads supporting customers: moving traffic safely, keeping sites compliant and operations running without interruption.

That work is driven by a simple belief: that through smarter temporary traffic systems, we can help create safer roads and lower carbon communities. It shapes the equipment we build, the technology we invest in, and the partnerships we form.

This brochure sets out what that looks like in practice, how we work with you, what you can expect from us, and the infrastructure that stands behind every promise we make.

I hope it gives you confidence in what SRL can offer. Our team is ready when you are.

Paul Lewis

Paul Lewis

Chief Executive Officer
SRL

> “THROUGH SMARTER TEMPORARY TRAFFIC SYSTEMS, WE CAN HELP CREATE SAFER ROADS AND LOWER CARBON COMMUNITIES ”

DRIVEN BY OUR VISION

Safer roads and lower-carbon communities through smarter temporary traffic systems.

We believe temporary traffic systems have a bigger role to play than simply managing a site, they protect the people working on and around it, and they can be delivered in a way that reduces the environmental footprint of every job. That’s the standard we’re working towards, on every contract, in every depot, on every site.

DEFINED BY OUR MISSION

To set the standard in temporary traffic systems with connected equipment and a customer-first experience.

In practice, that means equipment that’s monitored, maintained and ready before it ever reaches you; a service model that adapts to how your business operates; and people who treat your sites as if they were their own.

IRELAND'S LARGEST PROVIDER OF TEMPORARY TRAFFIC SYSTEMS

SRL supports roadworks, utilities, local authorities, events companies, commercial outlets and major infrastructure projects the length and breadth of the country. From single reactive callouts to multi-year framework contracts, our equipment and our people are trusted on sites of every size and complexity.

That trust isn't new. SRL was founded in 1997, and our founders' first breakthrough, developing the industry's first temporary two-way traffic signal to achieve type approval, set the tone for everything that's followed. Thirty years on, that same drive for innovation continues to shape our fleet, our technology and our service.

Today, that history is backed by scale and consistency: a national network and the largest temporary traffic equipment fleet in Ireland, which enable us to rapidly reach any site for our customers when plans change or urgent works arise. All assets that we deploy are maintained to a defined service standard, and every customer, regardless of size, has access to the same round-the-clock support.

Whether you need us once or every day, national coverage means local response, and local response means your sites keep moving.

We have evolved our equipment range to meet customer needs. Alongside our portable and temporary traffic signal systems, our portfolio includes variable messaging signs, temporary CCTV, and automated security barriers.

That breadth means fewer suppliers to manage, fewer gaps to fill, and a single partner who understands how all the pieces of your site work together, not just the signals.

NATIONAL REACH. RAPID RESPONSE.

- **Nationwide** coverage
- **Same day** response
- **20,000+** hire assets
- **Expert** support teams

OUR APPROACH

We know how challenging day-to-day operations can be - unplanned works, tight deadlines, compliance pressures, and the constant need to keep sites safe and moving. We also know that the right partner can make a real difference to how easily that's managed.

At the core of what we offer are four services, each suited to a different way of working:

SRL Ad-hoc **SRL Assured** **SRL Contract** **SRL Owned**

How you access them is up to you. Through SRL Flex (our framework agreement) you gain structured access to all four services, including SRL Assured, along with an enhanced management information suite from day one. Alternatively, individual orders let you set up a single-focus agreement under SRL Ad-hoc, SRL Contract or SRL Owned, without committing to a framework.

1. SRL Ad-hoc

2. SRL Assured

3. SRL Contract

4. SRL Owned

SRL | Remos

Model	What it means	Your commitment	
SRL Ad-hoc	You call us when you need us.	No contract, no minimum term - pay for work as it's carried out. Delivery and collection as you need it.	Remos services available
SRL Assured	A short-term commitment that flexes around your requirements.	Flex up within 24 hours and Flex down after 90 days.	
SRL Contract	A fixed-term agreement.	Minimum 36-month term, with 4 and 5 year options available.	
SRL Owned	You purchase and maintain the equipment.	Upfront equipment purchase.	

Our Commitment

No matter how you choose to Flex with SRL, we promise to support you fully, deliver equipment you can rely on, and stand behind you with the service, expertise and responsiveness your teams need.

HOW DO YOU WANT TO FLEX?

We designed our services to your needs, and to make it as easy as possible for you to find the right balance.

"I need kit now, or I'm short on capacity."	**SRL Ad-hoc** Overflow for peaks, urgent works and reactive jobs. No contract. One week minimum hire term.
"I want to be able to adapt as my workload changes."	**SRL Assured** Flex up within 24 hours and Flex down after 90 days.
"I am happy to invest in equipment, but want to avoid hidden costs."	**SRL Contract** A fixed weekly cost over a minimum three-year term, with all maintenance handled by SRL and equipment built to your specification.
"I want to own it and manage it myself."	**SRL Owned** Own the kit outright, specified to your needs. You take care of maintenance and day-to-day operation, with an optional service pack if you want support.

AT A GLANCE

	SRL Ad-hoc	SRL Assured	SRL Contract	SRL Owned
Commitment	7 days +	90 days +	3 years +	Yours to keep
Availability	Same day / next day*	Next day	7 days**	On request
Who maintains it	SRL	SRL	SRL	You (optional service pack)

Two ways to access them.

However you choose to work, you also choose how you buy. Two routes, one standard of service.

Route 1: SRL Flex

Our framework agreement. One structured agreement that gives you access to all four services, including SRL Assured.

- Preferential rates.
- An enhanced management information suite from day one.
- The freedom to move between services as your workload changes.

Route 2: Individual Orders

A single-focus agreement with no framework commitment. Choose it when you know exactly what you need.

- Available under Ad-hoc, Contract or Owned.
- Simple to set up and no framework to sign up to.

SCAN TO REQUEST A CALL BACK

*As standard SRL delivers on a same-day, next-day basis. In an emergency, we have a range of options to meet your customers' SLAs. **Any customisation increases order lead time to 8-10 weeks.

SRL AD-HOC

Flexible by design. Fast when it matters.

SRL Ad-hoc is our responsive short-term hire service, built for emergency, reactive and fast-turnaround works. You call, we deliver, and there's just a 1-week minimum hire term.

With the biggest temporary traffic signal equipment fleet in Ireland, shared across our depot network, the equipment you need is never far away. Our teams are on call 24/7/365, so there's always someone to help, day or night. You provide the traffic management and we provide the equipment.

You take on the extra work without the upfront cost or ongoing liability of extra equipment. You hire what you need, and SRL takes responsibility for maintaining the fleet.

What you get

- Fit-for-purpose temporary traffic equipment.
- Rapid same-day and next-day availability.
- The option to switch on Remos as and when you need it.

SRL ASSURED

The certainty of an owned fleet but with maximum flexibility.

SRL Assured is our managed hire model for customers who know they'll need signals for a sustained period but don't want a fixed multi-year commitment.

SRL Assured is built to move with your workload. Scale up when you win new work and temporary traffic equipment arrives within 24 hours. Scale down when things quieten and your fleet reduces in a planned, controlled way. You pay a clear weekly rate with service and support included, so budgeting and forecasting stay simple.

Because SRL Assured equipment comes straight from SRL's fleet, there's no lead time waiting on new stock. Every unit arrives serviced and ready to deploy, with a regular maintenance cycle behind it. If something fails, our priority is the fastest practical fix, whether that's a repair or a swap-out.

ONLY AVAILABLE TO SRL FLEX CUSTOMERS

What you get

- Fit-for-purpose temporary traffic equipment.
- Next-day availability.
- Once live, 90 days' notice is required to end the hire.
- The option to switch on Remos as and when you need it.

SRL CONTRACT

The benefits of ownership without the associated cost.

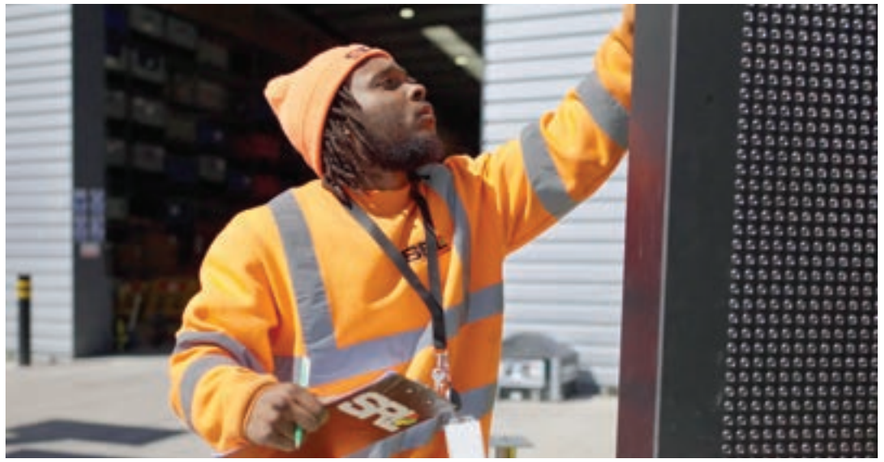

SRL Contract gives you the flexibility of owning the equipment with the cost certainty of hire. You take equipment on a fixed term, and we look after the rest.

It's ideal for traffic management work, where you can plan your fleet, allocate resources and forecast costs with confidence. SRL carries out all inspections and maintenance, scheduled and reactive, and every unit is fully serviced and ready for use on delivery.

SRL Contract offers a degree of customisation, if required.

What you get

- A minimum 3-year term, with further options for years 4 and 5.
- Scheduled and reactive maintenance.
- No fault breakage managed by SRL without additional/ hidden charges.
- 24/7 support from our nationwide depots, and training and onboarding for your team.

SRL OWNED

Complete control of your equipment, on your terms.

Several of our temporary traffic signal models are available for purchase.

All units are built to the robust standard of our rental fleet, with any agreed customisation. We offer an additional service wrap for our purchase equipment on a reactive and planned basis.

What you get

- A 2-year manufacturing warranty.
- An optional chargeable service pack for scheduled maintenance, or ad-hoc servicing charged as it's carried out.
- Telematics activated and assigned to your account, if included.
- Available ex-works, with delivery arranged on request.

SMARTER SYSTEMS

Technology you can connect, trust and act on.

We believe in smarter systems. It's about more than deploying innovative technology. It's about how you connect it, how you react to the information it gives you, and how you turn that information into insight.

That's fundamental to our approach. We build with our customers to keep you on the cutting edge of what's available and, more importantly, what's useful, as we optimise your temporary traffic equipment, fleet deployment and live site operations.

Connect it.

Every SRL signal is built to do more than stop and go. Choose the technology that suits your sites to keep your equipment powered, connected and moving traffic as efficiently as possible.

React to it.

Data is only useful if it leads to action. Traffic control is a safety-critical activity and should be managed through proper, structured systems. That's why our technology is backed by trained specialists, clear processes and a full record of every intervention, so control stays in the right hands. And if you need help, our technical helpdesk is there to keep things moving.

Turn it into insight.

Our customer data dashboards turn your data into clear insight, helping you make more intelligent decisions about your equipment, fleet and sites.

REMOS: CONNECTED EQUIPMENT

Remos is how SRL turns data into action. It connects your sites and equipment, so you can see what's happening, spot problems early and deal with them before they become your problem. Simple to switch on, and simple to switch off.

What is Remos?

Remos is SRL's remote monitoring and operating service. Lantra-trained operators monitor and manage your equipment from our secure operating facility, working to defined procedures so that every intervention is controlled, recorded and accountable. That supports safer sites, consistent compliance and clear governance.

Controlled through the SRL Control Hub

Remos monitoring and intervention is run through the SRL Control Hub, a browser-based system that tracks every intervention our operators make. Nothing is done off the record, so you always have a clear account of what happened on your site and when.

Know what your equipment is doing

Every Remos site feeds SRL Telematics, giving you remote visibility of your equipment. Battery alerts tell you when power is running low, so exchanges are planned rather than reactive. You can also see where your equipment is and how it's being used, without a site visit.

Insight that drives decisions

Everything Remos captures, from operator interventions to equipment performance, comes together in your insight portal. It gives you a clear view of how your equipment, fleet and sites are performing, so you can spot trends, compare sites and make more intelligent decisions.

Why it matters: clearer decisions, fewer surprises and the evidence to keep improving.

SERVICE WRAP: WHAT YOU CAN EXPECT FROM US

More than a product.

Behind the deployment of every SRL signal is an operational infrastructure designed to keep your sites running smoothly. It's the part you don't see, and the part you'll notice most if it's missing.

Always close. Our depot network gives you equipment, engineers and support across the country, for rapid deployment and consistent standards wherever you're working.

Always on. Our teams are on call day and night, 24/7/365. Whether it's a routine request, a configuration change or an emergency, you have guaranteed access to front-line expertise.

Always accountable. You have support from a team who understands your sites, your pressures and how you deliver. It means clarity, continuity and no chasing between departments. Our Central Operations Centre sits behind them, driving reactive service works, business support and account management.

Always compliant. Our service is managed to current compliance, health and safety and operational standards:

- TOPAS-compliant equipment.
- Defined service and inspection cycles.
- Safe working practices followed by every SRL engineer.
- Documented processes for installation, maintenance, escalation and response.

OUR SIGNAL PORTFOLIO

SRL offers the widest range of portable and temporary traffic signals in Ireland, covering everything from single-day works to complex, multi-junction schemes.

Our portfolio spans lightweight Rapid Response tri-pod units, ideal for fast, reactive deployments, right through to Urban64, which can replicate the full functionality of permanent signals.

Rapid Response

Up to 4 signals.
24 hours battery.

RadioLight

Up to 4 signals.
Up to 7 days battery.

EuroLight

Up to 18 signals.
Up to 7 days battery.
Multiphase ADS.

FIND OUT MORE

For more information on products & services, email **hire@srltraffic.ie**

UltraLight

Up to 18 signals.
Up to 9 days battery.
Multiphase ADS.
Remos enabled.

SolarLight

Up to 18 signals.
Up to 365-days battery.
Multiphase ADS.
Remos compatible.

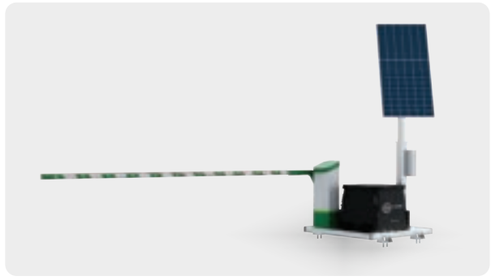

Urban64

Up to 64 signals.
Mains cabled.
MOVA / UTC / UTMC.

OUR WIDER PORTFOLIO

Alongside signals, SRL supplies a wider range of Intelligent Transport Systems (ITS) equipment to support your operations, including CCTV, Variable Message Signs (VMS), and security barriers.

RiseMaster

Fully autonomous, solar-powered.
Up to 3000 daily cycles.
3m-8m boom.

Instaboom

20-day run time.
150-times lifts a day / night.
Fully collapsible 4m boom.

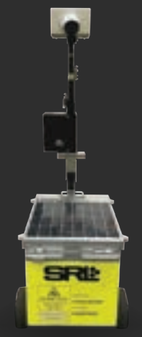

360º CCTV

360º panoramic view.
3.5m retractable mast.

Events CCTV

High-speed pan-tilt zoom.
6.5m retractable mast.

Portable ANPR

7m - 20m read range.
3.5m retractable mast

Smart Portable VMS

32 x 32px.
Compact Spaces.
Full colour RGB.

Smart Messenger VMS

80 x 48px.
Urban environments.
Full colour RGB.

High-Speed Smart Messenger VMS

80 x 48px.
High-speed roads or motorways.
Full colour RGB.

SETTING THE STANDARD

Held to the standards that matter

Safe roads start with safe operations. Our standards are independently assessed and our policies are open to view, so you don't have to take our word for it.

Independently certified for safety, quality, environment and fleet operations.

Our people

Our standards are only as strong as the people who deliver them. Our Way is our commitment to our colleagues and our customers: Bring your best. Build our future. It sets out what we expect from every person at SRL, and what they can expect from us. It sets the standard for how we work: safely, professionally and accountably, on every job.

- Every engineer and operative is trained and assessed as competent for the work they do.
- We invest in development and progression, so people can build a career with SRL.
- Our people take ownership of customer outcomes, from the first call to the last collection.

Safety

- RoSPA Gold Award for health and safety performance.
- Certified to ISO 45001 (occupational health and safety).
- SSIP-accredited.
- IOSH Directors, Management & Worker Safety training for our colleagues.
- Safe working practices followed by every SRL engineer, backed by our health and safety, lone working, fatigue and working time, PPE, and drug and alcohol policies.

Fleet and vehicles

- RoSPA Gold Fleet Award recognition for how we manage road risk.
- FORS Bronze accredited, the industry standard for fleet operators.
- FSGB telemetry and routine vehicle checks keep our vehicles safe, compliant and well maintained, while Samsara supports consistent driver standards on every journey.
- Our vehicles and drivers are on the road every day, so we hold them to the same standard as our sites.

Quality and environment

- Certified to ISO 9001 (quality) and ISO 14001 (environment).
- Achilles Carbon Reduce certified.
- Carbon reduction targets approved by the Science Based Targets initiative (SBTi).
- Our ESG policy sets out our approach to the environment and community.

Product and supplier standards

- TOPAS-compliant equipment, defined service and inspection cycles, and documented processes for installation, maintenance, escalation and response.
- Constructionline member.
- Red-book compliant approach

Data and governance

- ICO registered, with a published GDPR policy covering how we handle data, including Remos and CCTV.
- CyberEssentials assurance.
- Sanctions and compliance policy, and equality, diversity and inclusion policy.

Ready when you are

Whether you need extra capacity this week or a partner for the next three years, our team is ready to help.

Getting started is simple

Tell us what you need. Call or email.

We do the rest. Your quote, then equipment delivered to site or ready to collect.
